

## **PutToolsinSchools.org Resource Page**

The Key Roll of Put Tools in Schools is to Connect people to Jobs and Career Pathways that fulfill the creative genius in all of us. This page offers Companies and Organizations that will train and educate through an Apprenticeship Program or another in House Training Program.

Please help PTIS by listing your Companies opportunities in the contact us.

### **What does apprenticeship mean?**

An apprenticeship is a paid job where the employee learns and gains valuable experiences. Alongside on-the-job training, apprentices spend at least 20% of their working hours completing classroom-based learning with a college, university or training provider which leads to a nationally recognized qualification.

There are Countless Career Pathways in Construction, Manufacturing, and Service Companies that require no degree or formal Training. However, all require certain qualifications. Put Tools in Schools is developing a list of Companies and Organizations that have various Training Programs.
